

**Position: Enterprise Data Administrator**

**Location: Mississauga, Ontario**

### Position – Enterprise Data Administrator

Just Energy is looking for an Enterprise Data Administrator to work with the IT Services team supporting the storage and backup infrastructure. Working closely with the Senior Enterprise Data Administrator, you will be responsible for performance analysis, proactive troubleshooting and capacity planning for Just Energy's storage environment. The Enterprise Data Administrator is also responsible for dealing with day to day backup job maintenance and monitoring, making sure the backups are run successfully, making corrective actions to make sure backup failures are handled in a timely manner. The ideal candidate will be able to perform junior Windows Server Administration tasks as well. The position requires the successful candidate to participate in the on call rotation and will require afterhours work for planned changes and incident resolution.

### Why you should join Just Energy:

We are a North American market leader in retail energy, green energy, and home services, with a market capitalization of nearly \$2 Billion, and millions of happy customers. Our highly collaborative work environment is described by three simple words: ENERGY, OPPORTUNITY, and GROWTH. We provide an energetic and engaging work environment that is focused on professional and business growth, and where our colleagues have opportunities to excel and be rewarded with further growth opportunities, competitive compensation, performance bonuses, share ownership, and group benefits. If you are energetic, bright, driven, and you want to be part of something really great, then join us. You can realize your potential here at Just Energy.

### Your primary accountabilities:

- Will have a Computer Science degree or equivalent in real-world experience.
- must have 2-3 years of experience administering an HP XP SAN with Cisco fibre switches
- must have 1-2 years of experience with a backup and recovery solution, preferably Commvault
- must have a solid understanding of data backup and data recovery. This includes understanding backup scheduling, data retention and the equipment used to create a reliable backup environment.
- must have superior organization skills and a strong attention to detail
- must have a strong technical orientation; be a creative problem solver; and work well in a team-oriented environment.
- should have 2-3 years of experience administering an HP EVA SAN
- should have experience with HP Performance Advisor
- should have 2-3 years of Windows Systems Administration experience.
- should have experience with data management and able work with the end users to optimize data structures and information tiering.
- Should have a good understanding of a network and how it functions.
- Will have the willingness to learn and improve while working in a fast changing environment.
- Experience with and/or understanding of VMware is an asset.
- Experience with project management is an asset.
- Excellent oral and written skills are required.
- Should be an efficient user of Microsoft Office tools including Excel, Word, Outlook and Visio
