

FOR IMMEDIATE RELEASE

Ontario Energy Savings L.P. gives to Earth Rangers

Earth Rangers receives \$30,000 worth of energy and participation in the Green Energy Option program from Ontario Energy Savings L.P.

Toronto, Ontario – December 23, 2008 – Earth Rangers, a non-profit organization that empowers kids to improve the health of the planet, will be getting up to \$30,000 worth of energy donated as part of its new partnership with Ontario Energy Savings L.P. (OES) and its participation in OES's Green Energy Option (GEO) program.

“This generous donation from Ontario Energy Savings means a lot to us,” said Peter Kendall, executive director of Earth Rangers. “We inspire kids to take action to protect the environment so it is important that we walk our talk. Although the Earth Rangers Centre uses 79 per cent less energy than a typical building, we are still consuming energy and this still does have an impact on the environment,” continued Kendall. “With OES' support, and our participation in their GEO program, we are now able to do something about this impact.”

OES provides individuals and organizations with the ability to offset between 20 and 100 per cent of the harmful greenhouse gas emissions produced by their consumption of natural gas through its GEO_{gas} program. Through its GEO_{power} program, consumers can ensure that an equivalent of between 20 and 100 per cent of the electricity they consume is generated from renewable “green” sources, such as biomass, hydro and wind, and injected into the Ontario electricity grid.

“We're very pleased to be supporting Earth Rangers,” said Ken Hartwick, president and CEO of Ontario Energy Savings L.P. “As an organization that believes in the importance of sustainability,” continued Hartwick, “we value and respect the work that Earth Rangers does and we're very happy to play a part in helping to support the increasing environmental awareness of today's youth.”

In addition to offsetting potentially negative environmental impacts associated with its own energy consumption, Earth Rangers' participation in OES' GEO program supports the purchase of carbon credits and renewable energy credits, which are at the heart of OES's GEO program. By supporting these purchases, Earth Rangers is also helping to ensure that large scale carbon offset and renewable energy production projects, like those related to these credits, continue to be undertaken.

About Ontario Energy Savings

Ontario Energy Savings L.P. is a part of Energy Savings Group, a group of leading North American independent energy retailers who are affiliates of Energy Savings Income Fund, a publicly traded trust listed on the Toronto Stock Exchange. With over one million customers across North America, Energy Savings Group affiliates provide residential and commercial customers with protection from energy price volatility and an efficient and effective way to have a positive impact on the environment. About Earth Rangers

Earth Rangers is a non-profit organization that empowers kids to improve the health of the planet. Building on kids' natural connection to wildlife, its live shows and children's Web site, EarthRangers.com, motivates hundreds of thousands of kids each year to make realistic, lifestyle changes. Earth Rangers lives its values; its building has a Leadership in Energy and Environmental Design (LEED) Gold designation from the Canada Green Building Council, and uses 79 per cent less energy than a typical building its size. Visit EarthRangers.org for more information.
